

SALİH İBRAHİM USLUCAN

Sales Engineer & Business Development · Remote

Istanbul, Türkiye (UTC+3) · +90 534 890 40 67 · uslucansalihibrahim@gmail.com

[linkedin.com/in/salihibrahimuslucan](https://www.linkedin.com/in/salihibrahimuslucan) · github.com/salihibrahimuslucan · salihibrahimuslucan.github.io

Electronics & communication engineer (Kocaeli University, 2026) running international sales at a musical-fountain manufacturer, and writing the software the sales side runs on. The lead scanners, the CRM, the ERP and the company website are all self-built.

SKILLS

Automation & Integration: n8n workflow automation & custom nodes · LLM tool-use & RAG agents · LangGraph · LLM evals · Outlook/COM & Google Sheets API integrations · OCR (Tesseract) · TDD · Git

Programming: Python · TypeScript · JavaScript · C · C++

Backend, Data & Web: FastAPI · Flask · Docker · MCP · Supabase · Postgres/pgvector · Astro · Cloudflare Pages

CAD, 3D & Hardware: ezdxf · AutoCAD · DXF parsing · three.js / WebGL2 · DMX512 · RDM (E1.20)

Languages: English (fluent, C1) · Turkish (native) · Kazakh (B2)

WORK EXPERIENCE

Sales Engineer & Business Development · **Aquatronic — Musical Fountains**

Sep 2025 – Present

- Run international sales and business development: source and qualify leads, prepare quotations, and take customer and engineering meetings in English.
- Built the lead-generation automation the sales side runs on — n8n workflows that scan public procurement data and the web for open tenders, competitor wins and sector news, then deliver a filtered digest instead of raw noise.
- Wrote the Outlook-to-CRM engine: it reads the company mailboxes, matches every email to the right deal, and keeps the pipeline, activity log and next actions current.
- Sole developer of the ERP the team quotes and produces from — inventory, production orders, BOM consumption and CRM, multi-user on Postgres. Code: github.com/salihibrahimuslucan/aquatronic-erp
- Rebuilt the company website (Astro, Cloudflare Pages) with the product catalogue, lead forms and the mail/DNS setup behind the outbound.

Continuous Improvement & Maintenance Intern · **Rokeron (formerly Formiva)**

2025

- Applied 5S, Kaizen, VSM and SMED methodologies; performed preventive maintenance and fault diagnosis in industrial manufacturing workflows.

Operations Manager · Supervisor · Sales Consultant · **Mr. Panda · Zuma · FLO**

2021 – 2024

- Launched a restaurant's first online ordering channels (Trendyol, Yemeksepeti, Getir) and ran daily operations; earlier, scheduling, staff reviews, floor sales and customer service in retail.

PROJECTS

AquaOps Bot — n8n automation over a live ERP · **n8n · Postgres · LLM**

2026

- A morning operations report, a Telegram assistant whose LLM only classifies intent and never writes SQL, and an error watchdog — all on a read-only database role against the production ERP. Code: github.com/salihibrahimuslucan/aquaops-n8n-bot

Show Studio — Fountain Show Preview Engine · **three.js · WebGL2 · DXF · Web Audio**

2026

- Browser preview engine for musical fountain shows: import a DXF site plan, place catalogue hardware, generate choreography from music, play it in 3D and export a branded video. 522 tests, no framework, no CDN. Live demo: salihibrahimuslucan.github.io/fountain-show-studio

Control-Panel CAD Automation · **Python · TypeScript · LLM agents · ezdxf**

2026

- Python engine that turns a component netlist into rule-checked DWG schematics, built with LLM agents under a spec, 800+ tests and a lint gate. Open-source spin-off adds a FastAPI service, browser demo, MCP server and a TypeScript n8n community node. Live demo: spec2schematic.onrender.com

AI Microservice Stack · **FastAPI · Docker · Postgres/pgvector · LangGraph**

2026

- Containerized service: LLM tool-use agent loop, FastAPI REST layer, RAG over pgvector with cited sources, an eval harness with a CI regression gate, and the same agent ported to LangGraph and run side by side under a parity suite. Code: github.com/salihibrahimuslucan/ai-service-stack

EDUCATION

Electronics & Communication Engineering · **Kocaeli University**

2019 – 2026

Computer Science · **Politecnico di Torino**

2021 – 2022

VOLUNTEERING

Board Member · **KAZAKDER**

2022 – Present

- Presented at the Kazakhstan Trade Center opening; co-organized the 2nd Unity & Solidarity Festival.
