EDUCATION

Electronics & Comm. Engineering
Kocaeli University · 2019–2026
Coursework; did not graduate.

Computer Science
Politecnico di Torino
Left after first term — financial reasons.

LANGUAGES

English Fluent (C1)
Kazakh B2
Turkish Native

SKILLS

› Python
› C / C++
› MATLAB
› SAP SD
› MS Office Suite
› 5S · Kaizen · VSM
› SMED
› Android Dev (MVVM)

DOB

12 / 09 / 2001

SALİH İBRAHİM USLUCAN

Automation & Integration Builder · Solutions & Technical Sales

Self-taught builder with an electronics & communications engineering background. Writes the software, wires the control panel, and supports the sale — C++, Python, and web tools now in daily use at work.

WORK EXPERIENCE

Engineering Project Assistant · **Aquatronic** Sep 2025 – Present

- ▶ Build and maintain the company's internal tools — a native C++ (Win32) DMX/RDM manager, a production web app, a CRM, and a CAD-automation engine.
- ▶ Wire and assemble electrical control panels on the production floor, and plan the montage.
- ▶ Handle the commercial side too — write price offers, run the CRM, and join customer and technical-sales calls.

Continuous Improvement Intern · **Industry Internship** 2025

- ▶ Applied 5S, Kaizen, VSM and SMED methodologies; contributed to live improvement projects and production analysis.

Maintenance Engineering Intern · **Industry Internship** 2025

- ▶ Performed preventive maintenance and fault diagnosis, gaining hands-on experience in industrial manufacturing workflows.

Operations Manager · **Mr. Panda** 2023 – 2024

- ▶ Launched the restaurant's first online ordering and delivery channels (Trendyol, Yemeksepeti, Getir) and designed cost-effective menus.
- ▶ Ran daily operations and trained the team.

Operations Supervisor · **Zuma** 2022 – 2023

- ▶ Ran scheduling, staff reviews, and daily store operations.

Sales Consultant · **FLO** 2021 – 2022

- ▶ Sold on the floor, handled customer service, and kept stock and the store organized.

PROJECTS

AquaCONFIG v2 · **C++** · **Win32** · **RDM** 2025–2026

- ▶ Native Windows DMX/RDM device manager (Win32, GDI) with a full ANSI E1.20 RDM stack and custom PIDs; diagnosed a field PowerBox-repeater fault that was blocking RDM.

Control-Panel CAD Automation · **Python** · **ezdxf** · **AutoCAD** 2026

- ▶ Python engine that generates deterministic, rule-checked electrical-panel schematics (DWG) from a component netlist (ERC/BOM, test-driven), replacing manual CAD drafting.

AquaTronic Stock Manager · **JavaScript** · **Netlify** 2025

- ▶ Single-file web app with cloud sync, photo embedding, Turkish-aware search, and semi-automated stock deduction; in daily production use. Demo: aquastock.netlify.app

CRM Database & OCR Scanner · **Python** · **Flask** · **Tesseract** 2025–2026

- ▶ Consolidated thousands of trade-fair contacts into one scored database (HOT/HIGH/MEDIUM/LOW) with a structured data-quality cleanup; OCR tool digitizes handwritten fair notebooks.

Mobile Donation App · **Google Developer Student Club** 2024

- ▶ Participated in developing a point-based item-sharing platform promoting sustainability. Built on Android with Retrofit, Room, Google Maps & MVVM.

VOLUNTEERING

Board Member · **KAZAKDER** 2022 – Present

- ▶ Presented at Kazakhstan Trade Center opening; coordinated emergency support for Kazakhstani nationals during civil unrest; co-organized 2nd Unity & Solidarity Festival.
